EXPERIENCE

École Polytechnique | Palaiseau | France

Big Data Engineer

JUL 2016 - PRESENT

As part of the Data Science Initiative, I work in a project in partnership with the French national health insurance fund (CNAMTS), being one of the main engineers implementing a big data pipeline in Spark for processing over 3TBs of raw medical data into features for ML models.

Icaro Tech | Campinas, SP | Brazil

R&D Engineer

JAN 2015 - JUN 2016 | 1.5 year

At first, I worked with data analysis and visualization with R and SQL, then I started contributing to the company's products development with code, management tasks and decision making.

Icaro Tech | Campinas, SP | Brazil

Intern

JAN 2014 - DEC 2014 | 1 year

I started as a presales intern, working with price estimation and PoCs; then I changed to R&D to focus on data analysis and visualization.

Lince | Sao Carlos, SP | Brazil

Web Development Intern

JAN 2012 - AUG 2012 | 8 months

I used Javascript, CSS and HTML to contribute to the creation of the tool WebNCL, a web player for NCL multimedia documents.

EDUCATION

Univ. Federal de Sao Carlos | Sao Carlos, SP | Brazil *Computer Engineering*
